

24V inverter has LUP

Overview

The KUP error on the CPI-1575 Cobra inverter typically indicates a fault in the unit's internal circuitry or battery connection. First, inspect all battery terminals for corrosion or loose connections. The tech had installed the cobra brand 10' 4 awg cables and two 150 amp fuses on both the hot and ground. Why is my inverter not giving output?

Defective power switch REASON: One. Example 110v/115v air compressor that uses 9amps is a maximum of 1035 watts. Plus if your battery drops below 11 volts the unit will stop to prevent damage to the battery. Mine will usually go to about 10.3 volts then. Hello; I am using a CPAP breathing apparatus to assist my wife with her sleep while we are on our boat. The error message I received is not KUP but "LUP. " LUP actually refers to LVP, or Low Voltage. Over the past couple of years I had a 750 watt Vector Inverter powering a small microwave with no problems, I recently bought a little 1000 watt range that I wanted to use and I knew the 750 watt inverter would'nt power it so I bought a more powerful 1500 watt Roadpro Inverter from the truck stop. Hello, to play my xbox serie x in my vehicle, I bought a 615 A deep cycle battery to power my 1500 w inverter with which I power my xbox serie x.

24V inverter has LUP
