

Alofi electric vehicle adoption

Overview

This comprehensive systematic review explores the multifaceted impacts of electric vehicle (EV) adoption across technological, environmental, organizational, and policy dimensions. EV adoption continues to grow in multiple countries, passing tipping points. More than 17 million electric cars were sold worldwide in 2024, 20 percent of all new cars purchased. Drawing from 88 peer-reviewed articles, the study addresses a critical gap in the existing literature, which often. According to our Annual Energy Outlook 2023 (AEO2023), we project that electric vehicles (EVs), including both battery-electric vehicles (BEVs) and plug-in hybrid electric vehicles (PHEVs), will account for between 13% and 29% of new light-duty vehicle sales in the United States in 2050 and between. rning fossil fuels to meet our mobility needs. Over the past eight months, the rate of EV new registration growth in the US has plateaued and even pulled back month over month — leading to stories about a slowdown in EV.
