

Analysis of the scale of new energy storage industry

Overview

The global energy storage systems market was estimated at USD 668. 12 trillion by 2034, growing at a CAGR of 21. Despite policy changes and uncertainty in the world's two largest markets, the US and China, the sector continues to grow as developers push forward with larger and larger utility-scale projects. 05% during the forecast period (2026-2031). 7% from 2025 to 2034, driven by the increasing integration of renewable energy sources, advancements in battery technology, and the rising. Energy storage is expected to play a significant role in enabling the global data centre build-out, although the commercial and financing models developers will use are evolving, Energy-Storage.
