I've got some 36v eBike batteries that I picked up for a fantastic. The solar inverter serves as the heart of any photovoltaic (PV) power system, performing the critical function of converting the direct current (DC) electricity generated by solar panels or stored in batteries into the alternating current (AC) required by standard appliances. This allows any. are there any good 72v dc inverters?

I am mostly wondering that we went to 48v from 12v because of the amps involved and so why didnt we just get 72v like ebikes have. I am seeing inverters hit the market with higher the 48v setups but what about the smaller diy systems. Manufactured in accordance with COTS standard IPC-A-610.
