

Are there any tariffs on the export of photovoltaic panels

Overview

Currently, there are no export tariffs. In 2025, China's photovoltaic exports face challenges, such as US tariffs as high as 60% (including anti-dumping, anti-subsidy, and Section 301 tariffs), but opportunities are provided by countries along the "Belt and Road" and RCEP members. China's photovoltaic exports are strong, with solar cell. How much is the export tax on solar panels?

The export tax on solar panels varies significantly based on the country of origin, destination, and the regulations in place at the time of export. Generally, these taxes range from 0% to 25%, depending on trade agreements and local policies, 2. Read more Details: All 10% blanket tariffs enacted on "Liberation Day" are paused; tariffs on [China](#), [Canada](#), and [Mexico](#) remain in place, as well as all Section 232 tariffs.
