

Argentina Power Grid Energy Storage Frequency Regulation Project

Overview

The international tender, first announced in February, aimed to secure 500 MW of energy storage capacity for critical points in the Buenos Aires Metropolitan Area (AMBA) grid. In a strong show of interest, 15 companies submitted 27 different project proposals. The Argentinian government opened the bids this week for its AlmaGBA tender process. The first large-scale battery energy storage tender in Argentina is catching the attention of the international community as an unequivocal step towards modernizing power infrastructure. Intended to strengthen the grid in the greater Buenos Aires region, the program has attracted a lot of interest. Privatisation of the Power Industry and Sanction of the Regulatory Framework During 1989, privatisation took place in relation to many of the assets the national government had in the power industry, including the units of generation, transportation and distribution of energy.

Argentina Power Grid Energy Storage Frequency Regulation Project

[Buenos Aires Battery Storage: \\$540M Energy Project Advances](#)

The "Alma-GBA" initiative, as it's known, signals a decisive shift towards leveraging battery energy storage systems (BESS) to enhance grid reliability and prepare for a more ...
