

# Assembly of generator sets of Funafuti solar power station

## Overview

---

This study focuses on understanding the system response for three different renewable penetration scenarios. This article explores its technical features, real-world applications, and how it's reshaping energy access in challenging environments. The Funafuti – Tuvalu power system consists of a central diesel power station with three 600 kW diesel generators and smaller distributed solar generators. Unlike traditional grid systems, its modular diesel consumption by 40% in. The system consists of an AC-coupled off-grid system from SMA Technology, Germany; equipped with 9 x Sunny Island and 6 x Sunny Mini Central 8000TL based on 3 banks of 4500Ah FLA batteries each at 48V from BAE, Germany. The PV system consists of 46kW of solar power mounted on bespoke aluminium. Tuvalu inaugurated a 500Kw solar PV power plant on the atoll of Funafuti.
