

Australia Solar Off-solar container grid inverter

Overview

MyEnergy designs and builds turnkey off-grid systems inside 10-, 20- or 40-foot containers, pre-wired, factory-tested and ready to run the moment they land on site. What is a containerised off-grid system?

A complete solar-battery-generator power plant. Power where the grid can't go — delivered in a single, rugged container. Our The Rover system fits entirely inside a 10ft or 20ft shipping container and is equipped with all the hardware needed to produce renewable electricity, fresh clean water and the option of waste water. At Modbox, we design and build shipping container solar solutions to securely house your solar panels, batteries, inverters, and other equipment. Whether you're powering a remote worksite, an off-grid project, or a backup energy system, our containers are built tough for Australian conditions. A stunning off-grid container home in Gippsland features GoodWe's CEC-approved EHB hybrid inverter and Lynx F G2 battery, delivering sustainable living, blackout protection, and future-ready solar performance. Indoor or outdoor installation.
