

# Battery cabinet installation site in monitoring room

## Overview

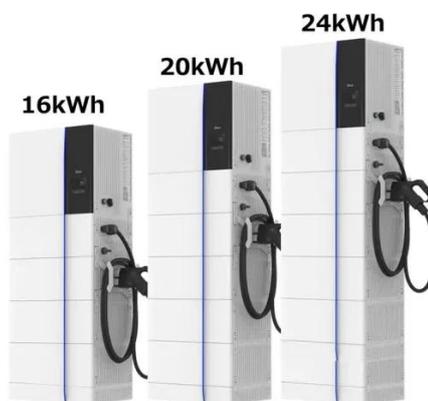

---

The mounting location must be suitable for the weight and dimensions of the product. Changes in Battery room regulation with International Building Code (IBC), Fire Code (IFC and NFPA), OSHA and best practices with IEEE have left questions on how to maintain compliance and industry standards. VRLA Batteries have specific requirements for compliance with the building codes, fire. Battery systems pose unique electrical safety hazards. The system's output may be able to be placed into an electrically safe work condition (ESWC), however there is essentially no way to place an operating battery or cell into an ESWC. On behalf of everyone at Eaton, we thank you for partnering with us, for trusting us to maintain your business continuity and for preventing downtime at your facility.
