

Battery energy storage prices in Moldova

Overview

1) Total battery energy storage project costs average £580k/MW. Building on this momentum, the second auction, scheduled for autumn 2025, will introduce battery energy storage systems (BESS) alongside wind projects, marking a pivotal step in enhancing grid flexibility and energy security. Moldova launched its first-ever large-scale green energy auction. Projected storage costs are \$245/kWh, \$326/kWh, and \$403/kWh in 2030 and \$159/kWh, \$226/kWh, and \$348/kWh in 2050. Are battery electricity storage systems a good investment?

This study shows that battery electricity storage systems offer enormous deployment and cost-reduction potential. 70% by 2027, reflecting trends. The Republic of Moldova has taken another significant step toward strengthening its energy security by initiating the procurement of a state-of-the-art Battery Energy Storage System (BESS). By 2030, total installed costs could fall between 50% and 60% (and battery cell costs by even more), driven by optimisation of manufacturing facilities, combined with better.
