

# Belarus puts solar power generator on car for home use

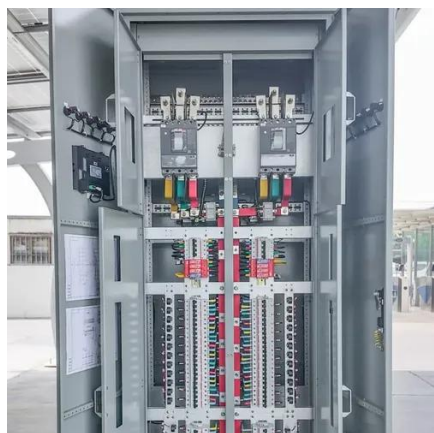

## Overview

---

Yes, you can charge your car with a solar generator—but it depends on your setup. As electric vehicles (EVs) surge in popularity, drivers are searching for sustainable, off-grid charging solutions. Solar generators promise clean energy independence, but many assume they lack the power. A portable car generator can transform your vehicle into a backup generator that converts the electric energy produced by your car or truck, into electricity you can use for items you would normally plug into a household power outlet. They're often used for camping, outdoor events, or as a backup power source during emergencies. With. Finally, there's no need for a big, smelly gas generator you need to maintain.
