

# Belarusian Folding Container Wind-Resistant Type

## Overview

---

Independent wind tunnel and full-scale testing conducted by the National Institute of Standards and Technology (NIST) and the University of Florida's Wind Science Center compared foldable and rigid container house configurations under simulated Category 3 hurricane. Independent wind tunnel and full-scale testing conducted by the National Institute of Standards and Technology (NIST) and the University of Florida's Wind Science Center compared foldable and rigid container house configurations under simulated Category 3 hurricane. Is a Foldable Container House Resistant to Strong Winds?

Foldable container homes get their strength against wind damage thanks to top quality steel frames, usually made from something called ASTM A588 Corten steel. These aren't your average building materials though. The way they work is pretty. Folding container house is a specially designed collapsible container house. A design that allows the container house to be folded into a relatively flat shape when it is not in use or when multiple containers house need to be transported to save space. They can also be combined horizontally or vertically for expansion, making them suitable for temporary accommodation, small shops, construction site duty rooms, and other scenarios. Unlike traditional homes, these modular dwellings are manufactured off-site in a controlled factory setting before being delivered and assembled on location.

## Belarusian Folding Container Wind-Resistant Type

### [X Type Steel Prefab Foldable Container House Wind Resistant ...](#)
