

# Bess system for solar factory in Sao-Paulo

## Overview

---

Grid operator ISA CTEEP has started commercially operating a large-scale battery energy storage system (BESS) at the Registro substation in the Brazilian state of Sao Paulo. The 30 MW/60 MWh BESS is expected to provide backup power to the grid during hours of peak demand in summer. About Luksnova Founded in the 1970s, Luksnova is a leading. The meeting brought together representatives from the solar and energy storage industry to discuss the advances and regulatory and economic bottlenecks for the development of the Battery Energy Storage System (BESS) in the country. This is one of the main arguments for deploying batteries in the country, from residential. The government of Sao Paulo, Brazil, says that a new 7 MW floating solar project on a reservoir in the megalopolis is the first phase of a 75 MW facility that will be completed in 2025.
