

# Can photovoltaic panels be installed on a tiled roof

## Overview

---

However, homeowners with tile roofs often wonder if their roofing material can support solar panel installation. The answer is yes—solar panels can be installed on tile roofs, but the process requires specialized techniques and professionals familiar with tile roofing systems. With the right equipment, proper planning, and professional installation, your tile roof can easily support a robust solar energy system. So, can you install solar panels on a tile roof?

The short answer is yes—but it requires careful planning and the right installation technique to ensure your roof remains intact and your solar system lasts for decades. Professional installation is crucial in navigating these challenges, such as ensuring proper weight distribution and addressing tile brittleness.
