

# Can solar panels be checked in

## Overview

---

Quick Answer: Solar panels require three types of inspections: a mandatory final inspection for new installations before activation, annual DIY self-inspections, and professional inspections every two years. Key items to check include panel surface condition, electrical connections, mounting. Safe, efficient solar power starts with a thorough (and required) inspection. Solar panel inspections cost between \$150 and \$350. When installing solar, permit fees sometimes include an inspection. Inspectors check the solar panels' structure and the electrical system. That's why we've created this ultimate checklist.
