

Can solar power supply be used for household use without energy storage

Overview

The short answer is yes: You can absolutely use solar panels without battery storage. In fact, the majority of residential solar installations in the U. are “grid-tied” systems without batteries (although solar + battery systems are becoming more and more common). Many home solar systems connect directly to the grid, allowing homeowners to use grid power when needed. However, battery storage offers benefits like energy during power outages, improved energy independence, and potential long-term cost savings. This blog will guide you through the process.
