

# Can't people live in a house after installing photovoltaic panels

## Overview

---

That depends on what you're spending on electricity, the amount of power that an installed solar photovoltaic (PV) system can provide, your finances, and your time frame for living in your home. Installing your own solar panels can be legal and cost-effective, but navigating the regulations requires careful planning. However, any. Solar, or photovoltaic (PV) panels as they're referred to in NFPA 1, Fire Code, are becoming more and more common on one- and two-family dwelling and townhouse roofs. Since the 2016 edition of NFPA 1, access pathways have been required on roofs to facilitate fire service access as well as egress. The DOE solar office addresses some common myths and misconceptions about solar energy and the installation process. Homeowners associations have been a historic friction point. Paradoxically, the states most likely to do this are some that would greatly benefit from solar power, like Oklahoma, Kansas, and Nebraska.
