

Cape Verde imported solar glass

Overview

Cape Verde continues to rely on solar PV glass imports for its renewable energy sector, with top exporters being Portugal, China, Lebanon, USA, and Senegal in 2024. The High Herfindahl-Hirschman Index (HHI) indicates a concentration of imports among these countries. The impressive Compound Annual Growth Rate (CAGR) of 2.5% over the last five years shows a steady increase in demand. An efficient Cabo Verde import process for raw materials and streamlined export of finished products can make or break the profitability of the entire operation. For a new venture in an island nation like Cabo Verde, understanding the nuances of its port operations isn't just an advantage—it's a necessity. In 2023, Cape Verde exported \$7.85k of Glass & glassware, making it the 192nd largest exporter of Glass & glassware (out of 222) in the world. In 2023, the main destinations of Cape Verde's Glass & glassware exports were Belgium (15%), Germany (12%), and the USA (10%). Belgium-based PV module manufacturer Belinus has launched an ultra-black double-glass bifacial heterojunction solar module for residential applications. By 2026, imports are expected to reach nearly \$10 million, up from \$8.4 million in 2021, representing a 2.5% CAGR. Since 2002, demand for Cabo Verdean glass has risen 8 percent year-on-year. For a typical 5 kW (5,000 watt) solar panel system, that works out to \$14,750.
