

Cape town europe renewable energy

Overview

Cape Town has embarked on an ambitious transition to renewable energy. As the global demand for sustainable solutions intensifies, the City is taking decisive steps towards reducing its carbon footprint and embracing clean, green power sources. Cape Town is set to accelerate its switch to green energy and limit reliance on erratic supply from the state power utility after winning a €150 million (R2.9 billion) loan from Germany's KfW Development Bank. Our commitment to sustainability is evident in our actionable plans and ambitious renewable energy. EU and South Africa start landmark negotiations on a Clean Trade and Investment Partnership. 7 billion Global Gateway package targets clean energy, connectivity, and health sectors. South Africa positioned as a strategic partner in EU's global green transition. Between 2013 and 2024, investments in these areas totalled approximately R25 billion, facilitating around 30 new projects.
