

China's first solar telecom integrated cabinet inverter connected to the grid

Overview

Undocumented communication devices have been discovered inside solar inverters and batteries manufactured in China, according to two sources familiar with the matter. energy grid relies on a device few people ever consider: the power inverter. Not. A group of engineers in the U. Everything looked fine at first, but buried deep inside, they found something that wasn't listed in the manuals: A small communication module capable of sending and receiving signals. These systems convert sunlight into electricity, promoting energy savings and operational efficiency.
