

Cleaning the roof solar panels in winter

Overview

In most cases, you shouldn't need to clean snow off your solar panels. Light can get through the panels when there's a light dusting of snow, and when the snow is heavier, the 45-degree angles of most equipment should facilitate the snow sliding right off. And when snow does become a problem, the easiest way to automatically remove snow on solar panels isn't a rake or a gadget; it's smart system design. Let's break down what actually works, what doesn't, and when snow removal really matters. The Great Debate: To Clear or Not to Clear?

The first question most solar owners ask is whether it's even necessary to. Snowy winter often means less solar energy production, but with effective solar panel snow removal, you can maintain good efficiency. In this article, we explore the importance of removing. Keeping your panels clear helps them work at their best, even in cold weather. However, on the flip side.
