

Container roof photovoltaic module installation

Overview

High-efficiency PV modules are mounted on the container roof to maximize sun exposure. Standard mounting hardware ensures fast and painless installation. Our 6kW and 12kW systems feature an additional connection for a ground mount array to add PV capacity if needed. Turn your container roof into a power station - without welding, cutting, or complicated installs! Our solar panel mounting kits are designed specifically for shipping containers. They screw securely to the container top tubing without piercing the envelope and the bottom channel, so you can mount. Some challenges and things to plan when mounting your solar panels on a container roof are: The solar panels and frame need to be safely secured to the container to withstand local environmental conditions. The weight of the panels and frame should rest on the corner castings and top side rails of. This product is the support rafters and leg mounts sized for fifteen 60 or 72 cell modules. Package include 9 support rafters, 18 leg footings for corner-mount to standard shipping container, cross. Shipping containers are known for their robust structure, making them an ideal foundation for solar panel installations.
