

# Cost of Off-Grid Charging Station Cabinets in Vietnam

## Overview

---

The investment required for a standalone 150 kW electric vehicle (EV) charging station in Vietnam ranges from VND 676 million for a single fast-charging unit to over VND 2 billion for a complete station with multiple units and associated infrastructure. Based on the number of charging ports relative to land area and population. The Vietnam Electric Vehicle (EV) Charging Infrastructure Market is witnessing rapid growth, fueled by the global transition to sustainable mobility and the widespread adoption of electric vehicles. Governments, automakers, and private stakeholders are heavily investing in expanding charging. Vietnam's electric vehicle (EV) charging infrastructure sector is accelerating amid the country's green transition, with the EV market valued at USD 3.12 billion in 2025 and projected to reach USD 7.2 Bn, is growing due to government support, urban development in Hanoi and Ho Chi Minh City, and rising EV demand. This. Huijue Group's energy storage solutions (30 kWh to 30 MWh) cover cost management, backup power, and microgrids. To cope with the problem of no or difficult grid access for base stations, and in line with the policy trend of energy saving and emission reduction, Huijue Group has launched an.
