

Cost of a 100kW Energy Storage Container for Australian Farms

Overview

This report analyses the costs of building a grid-scale battery in Australia (the NEM and WEM). 100kWh solar battery packs a serious punch — it's made for bigger energy needs, not your everyday home. Think factories, big farms, workshops, or off-grid setups. In Australia, more and more businesses and organisations are going solar, and storing power with a battery like this just makes sense. At SCS Australia, we design and deliver containerised energy storage systems that provide safe, efficient, and scalable power solutions for industries, businesses, and communities. Housed in durable shipping containers, our systems are engineered to meet the growing demand for renewable. We have access to the most advanced solar technology in the business, offering high efficiency 100kW solar systems to warehouses, industrial buildings, office complexes and retail stores across the country. Batteries are now becoming a core component of an increasingly decarbonised electricity grid.
