

# Do new energy photovoltaic panels make money

## Overview

---

Yes, solar panels are still worth it for the vast majority of U. The primary financial driver is the cost of grid electricity, which is projected to rise much faster than. As of 2025, solar panel installation per watt fell to just around \$2. This is on par with or cheaper than traditional plants in many regions, with a typical 11 kW residential system sticker price of \$29,000, or \$20,500 after applying federal and state tax credits. This mechanism not only provides immediate financial returns but also encourages the adoption of renewable energy. Additionally, by. Some leasing programs generate regular income by charging their customers a monthly bill, which includes the cost of the panel installation and any extra power the customers are using from the grid. Electricity generation savings, 2.
