

# Drilling holes in the frame of photovoltaic panels

## Overview

---

These mounting holes are typically located in the frame on the back or sides of the panel, not on the glass or the back sheet itself. By utilizing these pre-drilled holes, the installation system can safely anchor the solar panels without damaging the internal components. I'm retro-fitting and think it would be a far quicker and more secure to. I would like to drill through the frame of a Panasonic solar panel, red x, in 4 places. It would make my tilting mount idea simpler. The presence of these holes allows installers to easily position the panels.
