### East Timor Solar Plant: East Timor to Start Construction of First Large

East Timor plans to retire its diesel power plants in the "near-to-medium term". East Timor expects the construction of its first large solar power plant to begin in 2026 and become ...

### [East Timor Government Launches Solar Energy Project at the ...](#)

The project was launched in 2023 and aims to turn INFPM into an example of energy sustainability by installing solar panels that will guarantee a continuous and stable supply of energy.

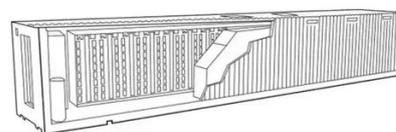

### [East Timor To Begin Work On 72 MW Solar Plant In 2026](#)

Japan's Itochu Corporation and Électricité de France (EDF) will jointly develop a 72 MW solar power plant and a 36 MW battery energy storage system in Manatuto. The two companies will ...

## Going Green

Australia's Market Development Facility (MDF) and ITP Renewables conducted an assessment of the potential market for roof-top solar energy systems in Timor-Leste.

### [East Timor solar plant: Unique 20MW Project Confirmed](#)

The construction of the solar power plant is a key component of East Timor's strategy to diversify its energy sources. The country has been heavily reliant on fossil fuels, but this new ...

### [Photovoltaic Solar Panels in East Timor Opportunities and Sustainable](#)

Summary: East Timor's renewable energy sector is witnessing rapid growth, with photovoltaic solar panels emerging as a key solution for rural electrification and sustainable development. This article ...

### [East Timor to Build First Large Solar Plant in 2026. Cutting Diesel](#)

East Timor to build its first 72 MW solar plant with 36 MW storage in 2026, reducing diesel reliance and advancing clean, affordable energy access.

### [In diesel-dependent East Timor, renewable energy transition remains](#)

Renewable energy potential is strong in East Timor, according to the Asian Development Bank, with almost the entire territory having the potential to successfully generate solar energy.

[East Timor expects construction of first large solar plant to start](#)

KUALA LUMPUR, Oct 17 (Reuters) - East Timor expects the construction of its first large solar power plant to begin in 2026 and become operational months later, the state utility's chair

**Solar energy is illuminating the path to energy access across East Timor**

Its equatorial proximity, limited grid coverage, and focus on rural development make East Timor an ideal market for solar energy, particularly for off-grid electrification, rural clinics, and village infrastructure.
