

Electricity distribution montevideo

Overview

Find info on Electric Power Generation, Transmission and Distribution companies in Montevideo, including financial statements, sales and marketing contacts, top competitors, and firmographic insights. The electricity sector of Uruguay has traditionally been based on domestic hydropower along with thermal power plants, and reliant on imports from Argentina and Brazil at times of peak demand. In 2005, Uruguay initiated a dramatic shift in its energy strategy, moving from petroleum-based electricity generation to renewable sources. This is separate from system upgrades.
