

Electricity market trends ankara

Overview

The 2025 International Energy Agency (IEA) Electricity Report analyzes key trends and projections in global electricity markets. Turkish electricity sector experienced several challenges over the last 3 years. 2021 saw a rapid increase in electricity consumption due to a rebound in economic activity as Covid-19 impact. Global electricity demand is expected to grow at an average annual rate of 3%. 2% decrease compared to the previous month. Recent data, updated. Türkiye is advancing its energy transition with ambitious targets to reduce emissions and expand renewable capacity, aiming for 65% renewables in electricity by 2035. According to data released by the Ministry of Energy and Natural Resources, Turkey's installed energy capacity reached 115,000 MW by the end of November 2024.
