

Estonia outdoor energy storage system

Overview

Estonia has laid the cornerstone for what will become the largest battery park in continental Europe, a major step toward synchronising the Baltic power grids with Europe by 2025; the project, led by Evecon, Corsica Sole and Mirova, aims to bolster energy security and support. Estonia has laid the cornerstone for what will become the largest battery park in continental Europe, a major step toward synchronising the Baltic power grids with Europe by 2025; the project, led by Evecon, Corsica Sole and Mirova, aims to bolster energy security and support. The 100 MW/200 MWh battery energy storage project in Kiisa began operation on Feb. 3 as scheduled – just two weeks after a testing fault at the facility caused the most significant disturbance to the regional power grid since Estonia's desynchronization from the Russian electricity system. When it comes to energy, compact Estonia thinks big. The country, aiming for a full-fledged green transition, is building unique infrastructure to bring this moment closer. KIISA, ESTONIA – February 3, 2026 – The Baltic Storage Platform (BSP) – a joint venture between Baltics leading renewable energy developer Evecon, French independent solar power producer Corsica Sole, and sustainable investment manager Mirova – today officially inaugurates the Hertz 1 battery. The launch of the Auvere battery storage facility marks a turning point in Estonia's energy landscape. With a capacity of 53 megawatt-hours—enough to cover just 2-3% of Estonia's average hourly electricity consumption—this pilot project may seem modest in scale. Yet its impact on the stability. Estonia's Tartu Energy Storage Power Station exemplifies how battery storage systems stabilize grids overwhelmed by solar and wind energy.

Estonia outdoor energy storage system

[Energy Storage: Estonia's Next Big Leap After the Solar Boom](#)

The launch of the Auvere battery storage facility marks a turning point in Estonia's energy landscape. With a capacity of 53 megawatt-hours--enough to cover just 2-3% of Estonia's ...

[Estonia moves forward with a groundbreaking energy storage complex](#)

The EUR100M project, led by Baltic Storage Platform, will deliver some of Europe's largest battery storage complexes with a combined capacity of 200 MW and a total storage capacity of 400 MWh, putting ...

[Estonia Tartu Energy Storage Power Station: Key Innovations](#)

Summary: This article explores how the Tartu Energy Storage Power Station addresses Estonia's renewable energy challenges. Discover cutting-edge battery technologies, regional energy trends, ...

[Estonia begins construction on Europe's largest battery ...](#)

Estonia is building the largest battery park in continental Europe, boosting energy security and supporting the transition to renewables.

[Groundbreaking for 400MWh BESS in Estonia](#)

Baltic Storage Platform, a joint venture (JV), has broken ground on two new 200MW/400MWh battery energy storage systems (BESS) in Estonia.

[100 MW Hertz 1 battery enters operation after Estonia-Finland grid](#)

The 100 MW/200 MWh battery energy storage project in Kiisa began operation on Feb. 3 as scheduled - just two weeks after a testing fault at the facility caused the most significant disturbance

[Estonia Power Plant Energy Storage Project: Key Insights and ...](#)

Summary: Estonia's power plant energy storage initiatives are reshaping the country's renewable energy landscape. This article explores the project's goals, technological innovations, and how it addresses ...

[Estonia Tartu Pioneers New Energy Grid Storage Solutions for a](#)

Tartu's new energy storage initiative directly addresses the intermittency challenges of solar and wind power. Imagine a city where excess wind energy from coastal regions gets stored in underground ...

[Estonia Strengthens Energy Resilience: Hertz 1. One of Continental](#)

KIISA, ESTONIA - February 3, 2026 - The Baltic Storage Platform (BSP) - a joint venture between Baltics leading renewable energy developer Evecon, French independent solar power ...
