

Excavator lifting a box of photovoltaic panels

Overview

The Solar Panel Lifter system is a revolutionary tool designed to streamline the installation and adjustment of solar panel modules in the field. By seamlessly connecting to a range of mini-excavators, this innovative system simplifies what can often be a labor-intensive process. This system reduces worker fatigue and wind gust concerns, increases worker safety, and gently handles the delicate modules. Handling solar panels is easy and efficient with UniMove solar panel lifters. UniMove offers a solar panel lifter for every step of your processing operations. What happens when two methods face off side by side?
