Overview

There are two main types of solar energy technologies—photovoltaics (PV) and concentrating solar-thermal power (CSP). On this page you'll find resources to learn what solar energy is; how you, your business, or your community can go solar; and find resources for every step. In the off-grid solar model, capital expenditures (CAPEX) are the costs to purchase and install the solar equipment, including the cost for the solar PV panels, battery, inverters, charge controller, distribution box, balance of system cost, and other general costs. In some cases, the developer may. Electricity generation by the U. electric power sector totaled about 4,260 billion kilowatthours (BkWh) in 2025. In our latest Short-Term Energy Outlook (STEO), we expect U. 6% in 2027, when it reaches an annual total of 4,423 BkWh.
