

Ground bracket for photovoltaic power station

Overview

Ground mounts allow easier angle adjustment, better sun exposure, and increased panel efficiency. PLP's POWER PEAK™ Ground Mount Systems offer a versatile and innovative range of solar racking solutions for residential, commercial, and utility-scale applications. The lineup includes three specialized systems: POWER DRIVE™ - Utilizes an I-beam, pile-driven design with a single-row, vertical post. The ground solar bracket installation system is designed to be suitable for solar farms with cement pier bases and ground screw pile bases. Galvanized material photovoltaic bracket material has excellent performance, providing long-lasting durability and a service life of more than 30 years. Since 1996, Solar Electric Supply has supplied the finest solar panel mounts from reputable manufacturers. The steadiness and safety of this product is complied with the international structural mechanics and construction acts. Unlike rooftop installations.
