

# How much GW of energy storage power station capacity is installed

## Overview

---

, September 26, 2025 — The U. energy storage market set a record for quarterly growth in Q2 2025, with 5.6 gigawatts (GW) of installations, according to the latest U. Energy Storage Monitor report released today by the American Clean Power Association. Electrical Energy Storage (EES) systems store electricity and convert it back to electrical energy when needed. The first battery, Volta's cell, was developed in 1800. power grid in 2025 in our latest Preliminary Monthly Electric Generator Inventory report. This amount represents an almost 30% increase from 2024 when 48. We represent public power before the federal government to protect the interests of the more than 55 million people that public power utilities. Houston/WASHINGTON, D. Hydrogen electrolyzers are not included.
