

How to draw the vertical structure diagram of photovoltaic panels

Overview

In this article, we will discuss how to draw a PV installation diagram and the protections that should be included, along with the symbols used to represent them. Photovoltaic Panels (PV modules) -> Symbol: A rectangle or a set of rectangles representing PV. This diagram is the electrical roadmap of your photovoltaic installation, providing a clear, concise overview of the entire system for the Authority Having Jurisdiction (AHJ) submission. Space requirements and layout for photovoltaic and solar water heating system components should be taken into account early in the design. In this guide, we'll break down the key components of a solar PV CAD drawing and how to interpret them effectively. It provides a visual representation of how the panels will be shading between the rows of modules. The design of a. © 2025 - 2026 Solar Diagram Tool.
