

How to install the photovoltaic U-shaped bracket

Overview

Design the layout of the photovoltaic panels based on roof area and shape. Prepare materials such as rails and fasteners. Secure rails in place using a level to ensure they are parallel and horizontal. Attach photovoltaic . U-bolts are key fasteners in photovoltaic bracket systems, mainly used to fix photovoltaic modules to supporting structures (such as columns, beams or rails). The manual provides the following content: (1) simple introduction. Align the base of the U-shaped bracket with the hole on the heat sink of the case, and then lock the M5*14 internal hexagonal screws. First lock the The installation is complete M8*20 internal hexagonal combination. This includes iron sheet/ground roof solar panel bracket installation, tile/slate roof solar panel bracket installation, aluminum ground bracket installation, concrete/sand installation bracket, etc.
