

Increased renewable energy penetration abkhazia

Overview

Abkhazia's energy landscape is undergoing a transformation. With renewable energy penetration reaching 30% in 2023, the region faces unique challenges in grid stability. Energy storage power stations have become the missing puzzle piece, acting like a giant battery for the. SUKHUM / AQW'A — First Deputy Prime Minister and Minister of Energy and Transport, Dzhansukh Nanba, recently addressed key issues and progress in Abkhazia's energy sector during a press conference at the Abkhaz State Television and Radio Broadcasting Company. The Ministry of Energy and Transport. Abkhazia is experiencing an energy shortage due to low water levels in the Enguri hydroelectric dam. Local authorities have begun enforcing rolling blackouts, suspended schools and cut off internet access to conserve power. After more than a year of unexpected blackouts, the authorities of Abkhazia initiated rolling blackouts within the state in July 2021, where during the night each region would be deprived of electricity for two hours.
