

Installing photovoltaic panels on your own roof is free

GRADE A BATTERY

LiFePO₄ battery will not burn when overcharged, over discharged, overcurrent or short circuited and can withstand high temperatures without decomposition.

Overview

The federal government does not provide free solar panels, but many states and utilities offer incentives that can reduce the cost of going solar. You can install solar panels on your roof with no upfront cost by signing a lease or PPA or taking out a \$0-down loan. The ITC — also known as the Federal Solar Tax Credit — is a popular tax rebate program offered by the US Federal Government for homeowners looking to switch to clean, renewable solar power. In August of 2022, the United States Congress extended the ITC while at the same time raising the total. When something is advertised as “free,” it usually comes with a few strings attached—free solar panels are no exception. Like with most free things, these solar programs have a catch (spoiler alert: they aren't actually free).

Installing photovoltaic panels on your own roof is free

[How To Get Free Solar Panels in America \(The Truth in 2025\)](#)

The short answer is that while no company gives away solar panels to own for free, there are absolutely ways to get a system installed on your roof with \$0 out of pocket.
