

Is it expensive to install solar power in Tokyo

Overview

A significant concern when mandatory solar panel installation is mentioned is the cost. 6 kilowatts, the subsidy is ¥100,000 per kilowatt. Additionally, Tokyo. The new regulation requires major housing developers—defined as those with a total annual supply of at least 20,000 square meters of floor space in Tokyo—to install solar panels on newly constructed buildings with a total floor area of less than 2,000 square meters. Existing buildings are not. Solar hardware costs rose briefly in 2022–2023 but have since begun declining again. Tokyo and some municipalities offer zero-interest or low-interest loans tied to solar and energy efficiency upgrades. The new regulation will require large house builders—those undertaking projects.
