Overview

Let's clear the air — the overwhelming consensus among scientists and engineers is that solar panels are generally safe. While myths around solar panel radiation risk circulate online, there is no evidence proving that rooftop solar systems cause harm to people living underneath. Solar panels offer a compelling mix of environmental benefits and financial incentives. Concerns about leaks, voided warranties, or long-term structural damage are common. Since the roof is one of the most critical parts of the home, it's natural to want reassurance. While solar energy can be a great investment, there are several negative effects that can arise from their installation and use. Roof Damage During Installation One of. The electromagnetic radiation from solar panels is minimal and similar to everyday devices like microwaves, posing no health risks. Research shows no link. As you're considering making the switch to solar, you may wonder, “Is it safe to have solar panels on my roof?

” The answer here is almost always yes; however, the following safety considerations should be reviewed to determine the condition of your roof before moving forward.
