

# Israel Residential solar System

## Overview

---

On December 11, 2025, a significant energy regulation officially took effect in Israel: all new residential buildings and certain types of towers are now required to install rooftop solar panels to obtain construction permits. According to the ministry's data, the average cost of installing a solar system in a multi-story building ranges. The National Council for Planning and Construction approved regulations promoted by the Planning Administration today, the Ministry of Environmental Protection, and the Ministry of Energy and Infrastructure. (Smileus at iStock, Getty Images) Varied tariff options, shortened payback periods, tax incentives, and. As the Israeli government steps up efforts to encourage homeowners to produce their own electricity from rooftop panels, "Globes" investigates the advantages and pitfalls. Israel's Ministry of Energy and Infrastructure has declared a new plan for installing solar panels on 100,000 roofs in Israel. Israel has introduced requirements for PV system installations on all new non-residential buildings with rooftop areas above 250 square meters and new detached residential buildings with roofs larger than 100 square meters. The Israeli government has introduced a regulation requiring PV system.
