

Japan can install solar power generation for home use

Overview

In a groundbreaking step towards sustainability, Japan has announced that all newly built homes will be required to have solar installations starting April 2025. This initiative is part of Japan's ambitious plan to reduce carbon emissions and promote renewable energy sources. The new regulation will require large house builders—those undertaking projects. If you're planning to get a new house or are considering getting solar panels, this guide will provide you with the essential information to help you understand solar installations and how to manage a solar energy system in Japan.
