

Kazakhstan hybrid energy storage power station

Overview

National oil and gas company KazMunayGas (KMG) and Italian energy giant Eni are on track to complete their innovative 247 MW hybrid power plant in 2026, combining solar, wind, and gas power to create a stable and reliable energy source. Kazakhstan is taking a significant step forward in its energy transition with a pioneering hybrid power project in Zhanaozen. This milestone follows an Agreement signed between NC KazMunayGas JSC (KMG) and Eni S. On July 16, an inauguration ceremony for the future hybrid power plant took place in Zhanaozen. The company is involved in major renewable energy projects in the country, with the aim of improving energy storage for its customers. The plant will have a capacity of 120 MW and will be based on. As part of the implementation of the instructions of the President of the Republic of Kazakhstan, Kassym-Jomart Tokayev, delivered on 28 January 2025 at an expanded meeting of the Government, comprehensive efforts are underway to ensure the systemic development of the electric power sector and.
