

Lithium battery power station in Portugal

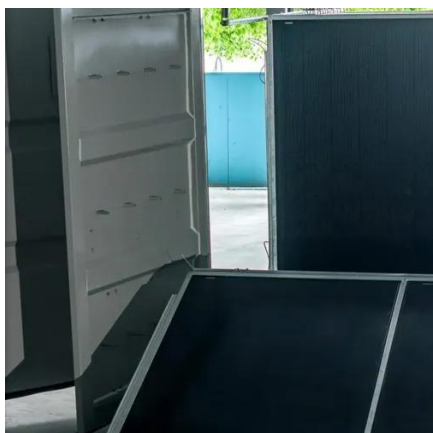

Overview

New field results from northern Portugal suggest the Barroso lithium deposit is bigger than earlier estimates. Brussels has again stamped the Barroso lithium mine as a “strategic project,” unlocking faster permits and new funding channels even as environmental lawsuits continue to pile up. • Commission confirms. The project to build a lithium battery factory for cars owned by the Chinese company CALB in Sines, with 15 GWh (Gigawatts/hour) of energy storage, is launched this Monday, with an investment of approximately two billion euros. In total, the EU executive is providing funding of €2. 9 billion for 61 “cutting-edge, zero-impact technology. Chinese battery manufacturer CALB has confirmed its plans to build a production facility for lithium-ion batteries in Portugal. The factory with an annual capacity of 15 gigawatt-hours is intended to start production in 2028. According CALB, the investment amounts to two billion euros. This investment denotes the region's latest effort to carve out a substantial share of the burgeoning global battery market, an.
