

# Maintenance of photovoltaic components and brackets

## Overview

---

The article outlines maintenance procedures for photovoltaic systems, including inverters, charge controllers, PV arrays, and battery banks. This report is available at no cost from the National Renewable Energy Laboratory (NREL) at [www.nrel.gov](http://www.nrel.gov). This includes checking inverters, charge controllers, PV. Photovoltaic (PV) solar energy conversion is a process that utilizes semiconductor materials, which are predominantly composed of silicon, to transform sunlight into electrical energy. It will also discuss how to efficiently operate and maintain your solar energy setup. All bolts, welds and bracket connections should be firm and reliable.
