

Malaysia solar power supply system with monitoring manufacturer

Overview

Solar Monitor MY is solar photovoltaics management system for industry-scale operators in Malaysia. It provides a complete package allows Solar PV operators to monitor whether their Solar PV sites are running at optimized performance in real-time via the Internet. We are a technology driven Solar PV company, proven ourselves by earning our MD status in 2024 after securing a matching grant in 2023 for the development of an Energy Cost Control Optimization System. Submission to Authorities, SEDA, Malaysia Green Technology and Climate Change Corporation (MGTC). Solar System Malaysia is a one-stop solar pv provider for large-scale solar projects and retail roof-top which covers residential, commercial, and industrial sectors in Malaysia. We are providing design and consultation, installation, and project management. We also offer EXCELLENT customer support. This track record demonstrates the company's expertise in providing end-to-end solutions for solar projects, covering a wide range of applications from residential properties to commercial and industrial facilities, as well as large-scale solar PV plants. Additionally, Solarvest offers operations. Established in 2014, we are one of Malaysia's solar PV system pioneers assisting Malaysia to transition towards clean energy. With over 2,600 projects completed, they focus on delivering clean.
