

# Mohua Solar Power Generation

## Overview

---

This book examines the home-grown Indian experience with private sector participation in power, identifies emerging risks, and proposes specific actions for government consideration, so that the power sector may fulfill its important role in India's growth story. Oxford Energy Senior Research Fellow Mohua Mukherjee explains where rooftop solar (RTS) fits in today's energy sector in India. Why are RTS projects lagging far behind utility-scale solar projects in the country?

What is being done by the government to increase the pace of RTS installations and why. (Metro Rail News): Another major development has been recorded in the Delhi Meerut RRTS corridor as Shri Srinivas Katikithala, Secretary, MoHUA inaugurated the largest rooftop solar plant installed by NCRTC, with a peak capacity of approximately 1 MWp (965 kilowatts KWp) at Ghaziabad RRTS Station. Two quick things: First, Concentrated Solar Power (CSP) seems to be making a comeback, in the era of green hydrogen! (Some of us may have thought that CSP was knocked aside in the marketplace by PV around 6-7 years ago, when solar panel costs tumbled due to over-production in China--but--"never say. Mohua Mukherjee has worked as a senior development economics professional and team leader for over twenty-five years at the World Bank headquarters in Washington DC. Her most recent work has centred on financial issues related to renewable energy, energy access, distribution utility reform, and. Shri Srinivas Katikithala, Secretary, MoHUA, visited the Delhi-Ghaziabad-Meerut RRTS corridor, reviewed its operational readiness, and inaugurated NCRTC's largest rooftop solar plant at Ghaziabad Station. He experienced the Namo Bharat train, praised multi-modal integration, and commended NCRTC's. Private Participation in the Indian Power Sector: Lessons from Two Decades.
