

Namibia Energy Storage Power Station BESS

Overview

The BESS station is under development by the, who own the station. The development receives support (financial and technical) from the (KfW). In December 2021, KfW made a grant of €20 million towards the development of this project, estimated at 80 percent of total cost. NamPower is expected to contribute about 20 percent of the cost and pay any outstanding taxes not covered by the KfW grant.

Namibia Energy Storage Power Station BESS

[NamPower Battery Energy Storage System \(BESS\) Project](#)

Use Cases: Voltage and Reactive Power Control
The Omburu BESS will be able to assist the grid stabilize voltage by injecting or absorbing reactive power with power electronics. The Omburu BESS ...

Energy storage plant Namibia

Key contracts have been signed for the first-ever grid-scale battery storage project in Namibia, signifying the African country's dedication to modernising its energy infrastructure, according to a top local official.

ESS

[Namibia to build first utility scale battery energy storage system in](#)

NamPower, Namibia's state-owned power utility, has signed a contract with a Chinese joint venture to build the first utility-scale battery energy storage system (BESS) in the country and the Southern ...

[Namibia's power corp launches procurement for 90 MWh battery ...](#)

The project features a 45 MW / 90 MWh BESS facility, representing the country's largest battery, and is part of the broader Transmission Expansion and Energy Storage (TEES) program.

[OMBURU BATTERY ENERGY STORAGE SYSTEM \(BESS\) ...](#)

Surplus electricity from RE generation as well as cheaper electricity imports from the Southern African Power Pool (SAPP) can be stored in the BESS. The stored energy could supply customers during ...

Erongo Battery Energy Storage System

The BESS station is under development by the Namibia Power Corporation (Pty) Limited, who own the station. The development receives support (financial and technical) from the German State-Owned Investment and Development Bank (KfW). In December 2021, KfW made a grant of EUR20 million towards the development of this project, estimated at 80 percent of total cost. NamPower is expected to contribute about 20 percent of the cost and pay any outstanding taxes not covered by the KfW grant.

[First Shipment Arrives for Namibia's Landmark 51MW Omburu Battery](#)

Namibia has reached a major milestone in its renewable energy journey with the arrival of the first shipment for the Omburu Battery Energy Storage System (BESS) Project, the country's first ...

Erongo Battery Energy Storage System

The Erongo Battery Energy Storage System, also Erongo BESS, is a planned 58 MW (78,000 hp) battery energy storage system installation in Namibia. The BESS, the first of its kind in the country ...

[Mega battery to facilitate breakthrough for renewables in Namibia](#)

The storage facility will be built at the Omburu substation, an existing grid node in northern Namibia. When the BESS is connected to the grid in early 2026, it will be one of the largest energy storage ...

[Namibia: EPC contract signed for first-ever grid-scale BESS](#)

Key contracts have been signed for the first-ever grid-scale battery storage project in Namibia, signifying the African country's dedication to modernising its energy infrastructure, ...

[Namibia's Energy Storage Breakthrough: The 54MW BESS Project ...](#)

In December 2023, the country signed contracts for its first utility-scale battery energy storage system (BESS) - a 54MW/54MWh project at Omburu Substation [1] [2]. But why should the world care about ...
