

Namibia energy storage power station subsidies

Overview

In Namibia, one of the largest electricity storage systems in southern Africa is currently being built – financed with a grant from KfW. Namibia has great potential for solar and wind energy, but so far it has not been able to store enough electricity. The city government will accept applicants until June 10 and subsidize a total of 1.2 million) to selected applicants. For those installing “design-type” BIPVs (designed to look less conspicuous), the city will cover up to. By 2030 the Namibian government plans to increase the share of renewable energies (RE) in its electricity generation from around 30% to 70%.
