

New Energy Storage Pipeline

Overview

The UK moved to overhaul the connections process, shifting away from a first-come, first-served model, after the previous queue had expanded to over 700 GW, around four times Great Britain's expected need by 2030. The reform was approved by UK energy regulator Ofgem in April. According to data from China's Energy Storage Application Branch (CESA), mainland China has seen a surge in energy storage activity, with 1,468 new project applications and 88 manufacturing initiatives launched. From ESS News China continued its high-growth energy storage market expansion in July. By the end of December 2025, China's cumulative installed capacity of new energy storage technologies including lithium-ion reached 144.7GW, representing an 85% year-on-year rise. Annual deployments are also set to scale in Germany, the UK, Australia, Canada, Saudi Arabia and Sub-Saharan Africa, driven. Top Ten States for Clean Power Installations in Q1 2025 • Q1 clean power deployment totaled 7. License: Creative Commons, Attribution-ShareAlike 2.

New Energy Storage Pipeline

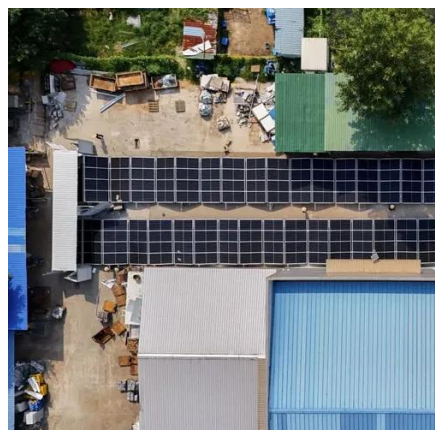

Energy-Storage.News

Battery energy storage projects have emerged as the dominant force in Australia's energy investment landscape, accounting for 46% of the nation's 64GW development pipeline, according to the ...

[Energy Storage Strategy and Roadmap](#) [Department of Energy](#)

The Department of Energy's (DOE) Energy Storage Strategy and Roadmap (SRM) represents a significantly expanded strategic revision on the original ESGC 2020 Roadmap.

[China energy storage project pipeline grows nearly 140 GWh in July](#)

China continued its high-growth energy storage market expansion in July 2025, with 1,556 new energy storage-related projects filed for registration, according to the Energy Storage ...

UK unveils 283 GW generation, storage pipeline after grid queue reform

The UK has filtered out its grid connection queue as its National Energy System Operator (NESO) confirmed today a reordered pipeline of 283 GW of generation and storage projects to be ...

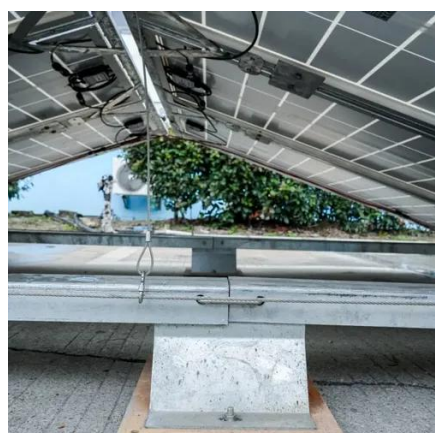

[Global Energy Storage Boom: Three Things to Know](#)

The removal of storage mandates in China for renewables and the absence of offsetting drivers were big concerns. However, a new energy storage target was set in September, underlining ...

[Clean Energy Pipeline Grows to \\$328 Billion, with 184 GW Primed for](#)

Battery storage achieved its strongest Q1 on record with 1.6 GW installed, pushing total U.S. storage capacity above 30 GW--a 65% increase from Q1 2024. This rapid deployment of ...

[10 cutting-edge innovations redefining energy storage solutions](#)

Here are ten notable innovations taking place across different energy storage segments, as highlighted in GlobalData's Emerging Energy Storage Technologies report.

[Power Storage Pipeline: The Future of Energy Infrastructure](#)

But what if I told you this innovation could be the "duct tape" holding our renewable energy future together? From underground hydrogen highways to molten salt superhighways, these systems ...

[At nearly 200GWh, China's new energy storage deployment rate hit ...](#)

By the end of December 2025, China's cumulative installed capacity of new energy storage technologies including lithium-ion reached 144.7GW.
